

AMENDMENTS TO THE CLAIMS:

This listing of the claims will replace all prior versions, and listings, of claims in the present application.

Listing of the Claims:

Claims 1-5 (canceled).

6. (Canceled).

7. (Currently Amended) ~~The method according to claim 6, further comprising,~~ A method for customer-individualized adjustment of a car radio having a microprocessor control and a corresponding internal operating software, the method comprising:

making a selection from a plurality of software modules for different functions of the car radio;

after making the selection, simulating a scope of functions of the car radio or a single one of the software modules;

storing the selected software modules on an external memory device;

connecting the external memory device to an interface in order to start operation of the car radio, the interface being adapted to change the internal operating software and to read the external memory device; and

loading the selected software modules stored on the external memory device into the car radio as an extension of the internal operating software.

8. (Previously presented) The method according to claim 7, further comprising providing the simulation over one of the Internet, an Extranet, an Intranet, another computer network, and a data medium.

9. (Currently Amended) The method according to claim ~~[[6]]~~ 7, wherein the external memory device includes one of a PCMCIA card, a chip card, a money card, a key card, a personal computer, and a notebook.

10. (Currently Amended) The method according to claim [[6]] 7, further comprising making available the selection of the software modules over the Internet.
